October 31, 1987 year-end results were restated by the banks in accordance with instructions for accounting loan losses issued by the Superintendent of Financial Institutions. For comparative purposes, the 1987 results are based on the same 10 domestic banks and 57 foreign bank subsidiaries in the Canadian banking system as at October 31, 1988.

\*Les banques ont révisé les résultats de fin d'exercice au 31 octobre 1987 conformément aux instructions sur la comptabilisation des pertes sur prêts données par le Bureau du surintendant des institutions financières. Aux fins de comparaison, les résultats de 1987 portent sur les 10 banques canadiennes et les 57 filiales de banques étrangères en place le 31 octobre 1988.

**INDUSTRY OVERVIEW**

**SURVOL DU SECTEUR**

## Chartered Bank 1988 Industry Overview

There are 10 domestic chartered banks, as well as 57 subsidiaries of foreign banks regulated and supervised by the Office of the Superintendent of Financial Institutions. Two of the domestic banks, B.C. Bancorp and the Continental Bank of Canada, are in liquidation. The six largest domestic banks, the major banks, accounted for 90.5% of total banking assets in Canada at October 31, 1988.

At October 31, 1988, the total deposit base of Canadian banks was \$396 billion with deposits for the major banks amounting to \$361 billion. Of the total deposits, Canadian currency deposits were \$239 billion; the major component (\$159 billion) was personal savings deposits. Total deposits have decreased from \$398 billion at October 31, 1987.

Total assets at October 10, 1988 were \$502 billion, with 69% in loans, 8% in acceptances, 9% in cash resources, 10% in securities, and the remainder in fixed and other assets. Asset growth over the previous 12-month period was 5.7% or \$17.8 billion, of which approximately 70% was attributable to net new mortgage volume.

Each of the major banks has extensive operations in foreign countries. In aggregate, these banks had \$133 billion (29.6%) of their total assets held outside Canada at October 31, 1988.

Chartered banks also have a growing fee-generating Off-Balance Sheet business, which includes issuing letters of credit, granting credit commitments, entering into financial futures and forward rate agreements, interest and currency swaps, note issuance and revolving underwriting facilities, among others.

During fiscal year 1988, the increase in Shareholders' Equity amounted to 11.1% or \$2.2 billion. Common shares issued accounted for \$1.2 billion of the increase (\$0.6 billion attributable to the purchase of securities dealers); the remainder was due to net income retained after payment of dividends. Using a broader measure of capital, which includes preferred shares and debentures, total capital funds increased \$3.7 billion to \$29.4 billion at October 31, 1988.

During 1988, in Canada, the Office of the Superintendent of Financial Institutions endorsed the statement on the International Convergence of Capital Measurement and Capital Standards issued by the

## Survol du secteur des banques à charte

Au Canada, on compte 10 banques à charte canadiennes de même que 57 filiales de banques étrangères réglementées et surveillées par le Bureau du surintendant des institutions financières. Deux des banques canadiennes, soit B.C. Bancorp et la Banque Continentale du Canada, sont actuellement en voie de liquidation. Au 31 octobre 1988, les six plus grandes banques à charte canadienne (les Six Grandes) intervenaient pour 90,5 p. 100 de l'actif total des banques actives au Canada.

Au 31 octobre 1988, l'ensemble des dépôts des banques canadiennes se chiffrait à 396 milliards de dollars, dont 361 milliards pour les Six Grandes. Les dépôts en dollars canadiens représentaient 239 milliards de dollars; de ce chiffre, les dépôts d'épargne des particuliers comptaient pour 159 milliards de dollars. L'ensemble des dépôts a connu une diminution par rapport aux 398 milliards de dollars enregistrés au 31 octobre 1987.

Le total de l'actif des banques au 10 octobre 1988 s'établissait à 502 milliards de dollars, répartis comme suit : 69 p. 100 en prêts et 8 p. 100 en acceptations, 9 p. 100 sous forme d'encaisse, 10 p. 100 en valeurs mobilières, et le reste, en immobilisations et autres éléments d'actif. Par rapport au 12 mois précédents, le total de l'actif a augmenté de 5,7 p. 100 (17,8 milliards de dollars); environ 70 p. 100 de cette hausse est attribuable à l'augmentation du volume net des nouveaux prêts hypothécaires.

Les Six Grandes banques à charte sont toutes représentées à l'étranger. Au total 133 milliards de dollars (29,6 p. 100) de leur actif global était investi à l'extérieur du Canada au 31 octobre 1988.

Les banques à charte effectuent également un nombre sans cesse croissant d'opérations hors bilan qui leur rapportent des revenus : par exemple, l'émission de lettres de crédit, l'octroi de facilités de crédit, les opérations financières à terme et les contrats à terme de taux d'intérêt, les swaps de taux d'intérêt et de devises, les facilités d'émission d'effets et les facilités renouvelables à prise ferme.

Au cours de l'exercice 1988, l'augmentation du capital social ordinaire s'est chiffrée à 2,2 milliards de dollars (11,1 p. 100). Les actions ordinaires émises ont accaparé 1,2 milliard de dollar (600 millions de dollars pour l'achat de maisons de courtage en valeurs mobilières), le reste prenant la forme de retenues après versement des dividendes. Si l'on applique un critère de mesure des capitaux plus répandu, qui englobe les actions privilégiées et les débentures, l'ensemble des capitaux a augmenté de 3,7 milliards de dollars pour passer à 29,4 milliards de dollars au 31 octobre 1988.

Au cours de 1988, le Bureau du surintendant des institutions financières (BSIF) a entériné au nom du Canada la position sur la Convergence internationale de la mesure et des normes de fonds propres, émise

Bank for International Settlements (BIS). The intent of the statement was to set out an agreed international framework for measuring the capital adequacy of international active banks and the minimum standards to be achieved. The BIS standard requires a minimum ratio of capital to risk weighted assets of 8% by the end of 1992.

The capital of the major banks at October 31, 1988, based on the BIS capital definitions adopted this year, was \$28.2 billion or 7% of risk-weighted assets. This ratio compares with the 7.25% minimum target level to be achieved by year-end 1990.

The major banks earned net income before extraordinary items of \$3.3 billion in fiscal year 1988, up 14% over the previous year. Return on Assets, a common measure of bank profitability, rose from 0.68% in 1987 to 0.75% in 1988.

par la Banque des règlements internationaux (BRI). Cette initiative avait pour but d'établir un cadre international uniforme pour la mesure de la suffisance des fonds propres des banques internationales actives et les normes minimales qu'elles devaient respecter. La norme de la BRI prévoit un ratio de fonds propres pondéré en fonction des risques d'au moins 8 p. 100 d'ici la fin de 1992.

Au 31 octobre 1988, les fonds propres des grandes banques, selon la définition adoptée cette année par la BRI, s'établissaient à 28,2 milliards de dollars, soit un ratio pondéré en fonction des risques de 7 p. 100, ce qui correspond presque au niveau objectif minimal de 7,25 p. 100 que devront atteindre les banques d'ici la fin de 1990.

Au cours de l'exercice 1988, les grandes banques ont enregistré des gains nets de 3,3 milliards de dollars avant déduction des postes extraordinaires, en hausse de 14 p. 100 par rapport à l'exercice précédent. Le rendement de l'actif, une mesure commune de la rentabilité des banques, est passé de 0,68 p. 100 en 1987 à 0,75 p. 100 en 1988.
